ACKNOWLEDGEMENTS

This book arises out of my PhD thesis written at the KU Leuven. It would not have been possible without the support of many people. First, I would like to thank my PhD supervisor and co-supervisors, Professor Dr Marie-Claire Foblets, Professor Dr Piet Van Nuffel and Professor Dr Geert De Baere, for their suggestions, debate and discussion. I am also very grateful to Emeritus Professor René Foqué and my colleagues at the KU Leuven for their support and intellectual stimulation. Moreover, I owe gratitude to FWO for granting me a scholarship which made it possible to carry out research. I would also like to thank Pascale Van Houtte, publisher at Intersentia, for her invaluable cooperation in steering this book to publication. Finally, I would like to express my heartfelt thanks to my friends and family for their ever-present support.
